Isle of Capri Q 4217

Dear Ross,

I can't express my thanks enough for the difference your product has made to my lifestyle. Not only are the detectors easily installed but they are neat and unobtrusive, also quick and simple to monitor. I know if there should be a problem at any time it will be detected early before any damage can be done.

TermidTECTA relieved me of concern regarding the use of chemicals and frees me from twice yearly inspections which are not only costly, but with the pulling back of carpets and interior checking of cupboards and wardrobes, invasive; albeit no doubt necessary. I can now do all that myself as many times as I wish, and at any hour without running the risk of a problem presenting itself before the next six monthly inspection. A period during which, unknown to me, substantial damage could have occurred.

In other words, I have peace of mind and feel completely in control at all times. I thank you for that and wish you and this wonderful product every success.

Sincerely,

*M. Romaniuk*
